

# FORRÓ RED LIGHT

LIVE

Using electronic bases as the starting point for re-reading one of the most traditional genres of Brazilian dance music,

Geninho Nanacoa and Ramiro Galas invite the restless feet and curious ears to immerse in a dancing experience with Forró Red Light project.

Through versions and classics of forró, xote and frevo, the duo performs their captivating live set, resignifying traditional Brazilian rhythms with samples, remixes and elements of electronic music like Acid House, creating a contemporary forró, called by the musicians themselves as a “Forrobodó Live PA”.

Putting your body and mind in the particular universe of Forró Red Light, will make you dance in an atmosphere of organic and electronic rhythms that sticks to the neck and make feet and hips move frenetically through the dance floor.
