

TREPANADO

DJ SET

Trepanado is the stage persona of Augusto Olivani, one of the founders and current commander of Selvagem party and also of Selva Discos label. Selvagem is one of the most important and influential dance music labels in Brazil and Latin America, with an 8 year history of transformations in the continent's electronic music scene with its anarchic approach that mixes obscure House, Techno, Soul, Jazz and nearly every other musical style.

His sets and his performances, with a technique that amazes the greatest music aficionados, Trepanado has already played not only at Selvagem's own parties (and in the legendary Carnival Party in Rio), but also throughout Brazil and in Latin American countries such as Argentina, Chile, Colombia, Uruguay and Mexico. With 5 european and American tours, he has also shown his talent at events and clubs like Dekmantel Amsterdam, Full Moon Festival in New York, Calvi on the Rocks, Concrete Paris, Sub Club (Glasgow) and Zukunft (Zurich).

In June, he will release a compilation called "Street Soul Brasil" through New York's Hello Sailor label, exploring Brazil's mellow pop and romantic rap from the late 80s until the mid-90s, a story told along 10 soughtafter songs. Think of any style, rhythm, or music genre: Trepanado certainly has a dozen records and references on this subject, and he does not hesitate to distill this patrimony and control dance floors and bodies around the world with his rich repertoire.
